

This weeks Recreate image is *Shadows* by photographer, Suzanne Saroff. In this series of photographs Saroff uses commonplace objects and shadows to emphasise their texture and perspective. These usually include glass, flowers and fruit in different arrangements and colours.

TIP: Use a lamp and the flash on your phone to help create the shadows. After you've taken the photo try different filters to change the colour.

You can either to to replicate it exactly as it is, or take inspiration and create your own!
