

Wednesday Workshop | Task 09 | 10 June 2020

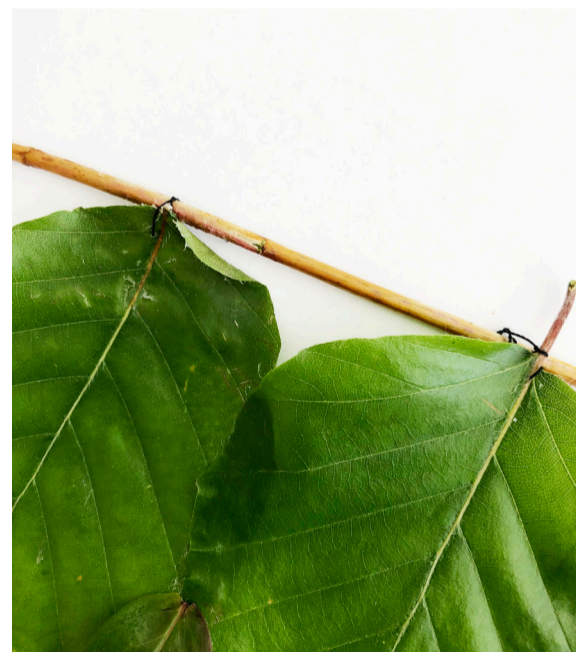

Step 01. Gather some leaves and petals that will make your natural wall hanging. You will need glue, a needle and thread or string.

Step 02. Layout your design. Think about colour, texture and size. The branch at the top will be what you attached them to.

Step 03. Once you have decided what you want it to look like, you can start to glue them together.

Step 04. Then you need to tie the leaves to your branch. Use the needle and thread to do this. Push the needle through the stem so the leaf does not rip.

Wednesday Workshop | Task 09 | 10 June 2020

Step 05. Tie a piece of thread to each end on the branch so you can hang it up.
