**Download some of these free apps.**

[Plane Finder](#) – Flight Tracker.

This very simple, user-friendly app lets you search for flights and aircrafts using 23 different markers and displays airline logos next to planes for easy identification.

You can simply tap on a plane to see flight information including photographs and add bookmarks and filters to the app for easy use next time you're in the app.

Plane Finder also uses ADS-B signals to provide accurate flight information.

The app also harnesses augmented reality to help you identify planes overhead using your phone's camera, according to the app's website.
