

Technician Scientist Apprenticeship

Level 5

39 months

Technician scientists conduct routine lab investigations using bench and instrument techniques, applying established scientific principles to collect, analyse, interpret data, and report results and progress updates.

Apprenticeship overview

Technician scientists work in various industries like the chemical, pharmaceutical, and biotech sectors, in both large and small organisations. Typically lab-based, they collaborate with scientific teams, communicate findings, and ensure work quality. Operating in regulated, predictable environments, they make informed decisions, follow safety and ethical standards, and critically evaluate scientific methods to solve routine problems. They contribute to project management, maintain accurate records, use data systems, and support new scientific ideas. They may also manage resources within defined areas, playing a vital role in supporting scientific research and ensuring reliable lab results.

Typical job roles

Laboratory Analyst, Laboratory Assistant, Laboratory Co-Ordinator, Laboratory Research Assistant, Microbiology Support Scientist, Process Development Technologist, Quality Control Laboratory Assistant, Senior Laboratory Technician, Technical Laboratory Assistant

Why choose an apprenticeship for your business?

The benefits, in brief:

- Retrain and upskill your current team
- Fill skill gaps and expand your workforce
- Diversify your team and bring in fresh ideas

Why choose us?

- We are one of the biggest apprenticeship providers in the region
- We are funding experts and can help you get the maximum benefit of government funding available to you
- We will support you as an employer and your apprentice throughout the apprenticeship journey
